☆ Not Recommended for Christmas Tree Production.

The seed from the Scotch Pine Special was collected by Christmas Tree Growers in Canada. They had just one thought in mind . . . better Christmas trees. The seed was gathered from blue colored trees with a straight stem and the right degree angle of branches. This should produce trees of better quality, but is only experimental. If you wish to place order for Spring 1958, I would advise placing it now for the Special Scotch Pine. We have only 2 beds of this stock and will not accept orders for more than 2,000 trees.
